

Description

Crest CAE-2 is an off-white powdered product that is used at low concentrations to remove oxides and etch aluminum alloys. Do **not** use on castings. Crest CAE-2 can be used in a dip immersion or spray process to provide a uniform etched surface.

- » Contains biodegradable detergents to form a small foam blanket to keep the etchant smell down.
- » At the recommended concentrations, the etch rate is 0.05 ml. per minute.
- » Etching produces a surface finish not exceeding 120 RMS.

Method of Use

Application Methods

- » Immersion
- » Spray

Mixing Instructions

- » **Immersion:** 6 to 12 oz. per gallon of water.
- » **Spray:** 4 to 8 oz. per gallon of water.

Application Instructions

- » **Immersion**
 1. Immerse the part in a tank heated to 140° to 160°F.
 2. Remove the part and rinse with cold water.
- » **Spray**
 1. Spray the part with a solution heated to 140° to 160°F.
 2. Rinse the part with cold water.

Caution

Refer to product labels and Safety Data Sheets for precautionary and handling information.
